A Sneak Preview of the TL6.5 II Production

May 21, 2015

A super good looking TL6.5 II Main Audio production board -- tested and ready for assembly.

Let's take a detail look at each section.

Same Gain Stage as TL7.5 III

Same Output Modules as TL7.5 III

Right Attenuator

TL6.5 II Main Audio Section

Left Attenuator

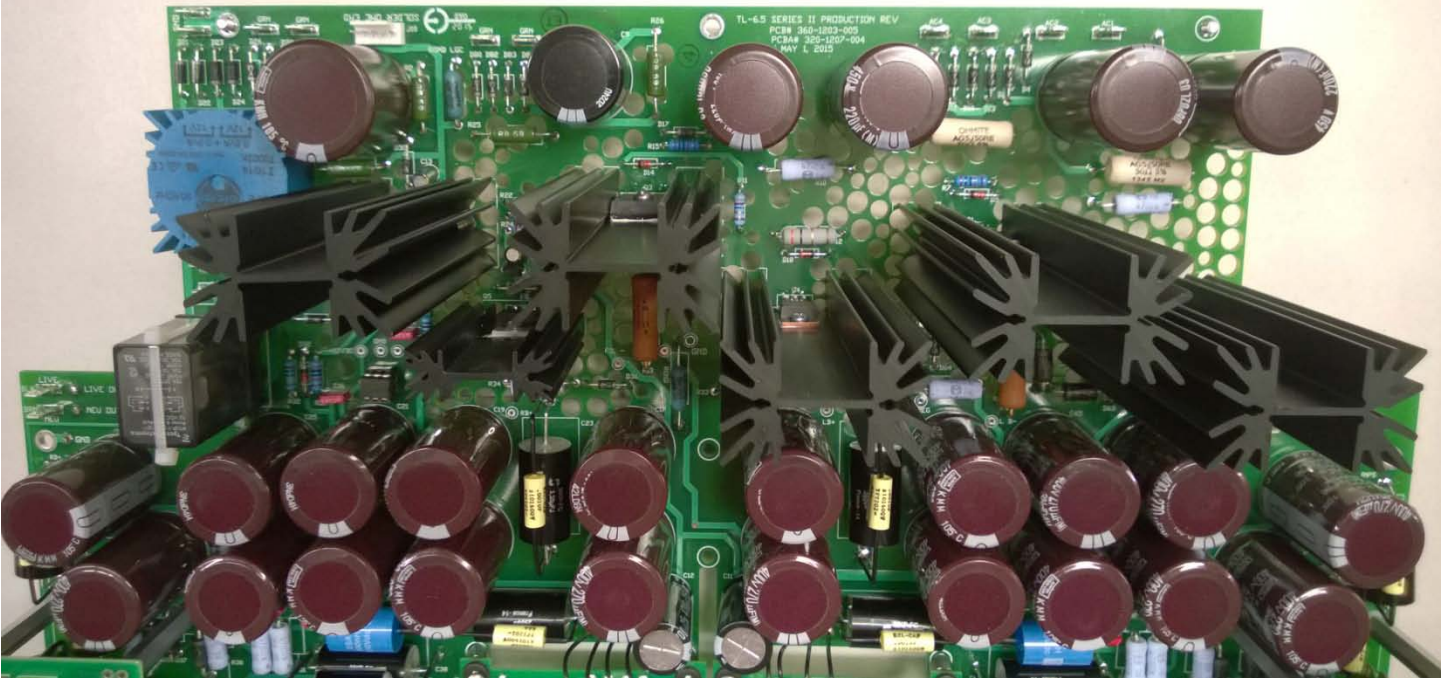

Main Audio section is very similar in layout and configuration as the TL7.5 III. In fact many of the parts are shared between the two models.

Audio section also shares many of the same audiophile grade film and foil capacitors as the TL7.5 III.

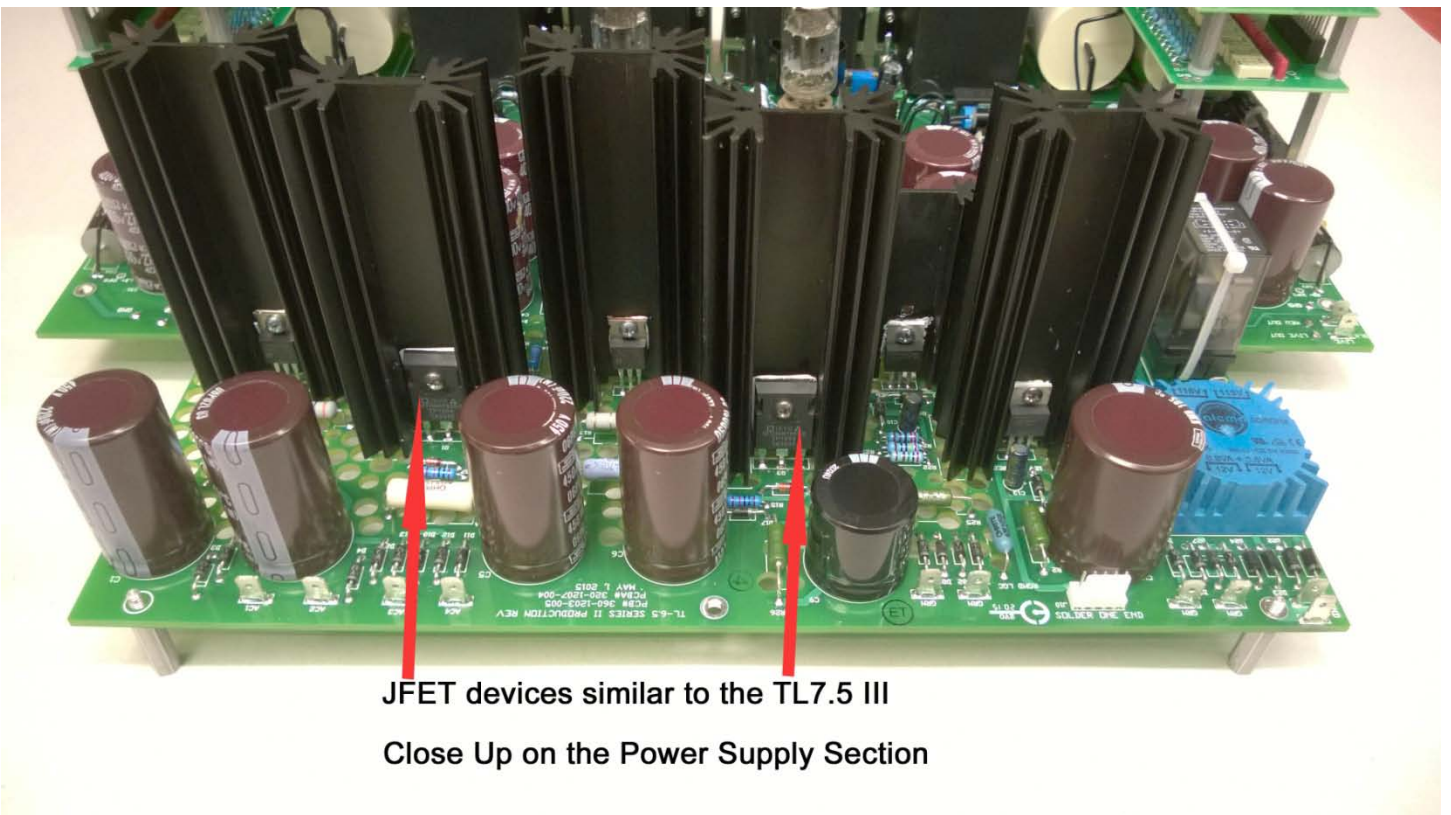

Audiophile grade caps fitted nicely under the Attenuator board

TL6.5 II Power Supply Section

A good solid power supply section with lots of tall heatsinks and ventilation holes.

JFET devices similar to the TL7.5 III
Close Up on the Power Supply Section
